ANEXOS

DISEÑO DE LA VÍA EXPRESA SUR POR LA NORMA DG-2014

Tesis para optar el Título de **Ingeniero Civil**, que presenta el bachiller:

Dennis Emerson López Ortecho

ASESOR: José Luis Reyes Ñique

Lima, Octubre de 2016

ÍNDICE

1	Evaluación actual de la zona del proyecto	1
2	Movimiento de Tierras (Earthworks)	6
3	Compatibilización del Alineamiento Horizontal y Vertical con la norma DG-2014	20

LISTA DE FIGURAS

LISTA DE TABLAS

Tabla 1: Reporte de Volúmenes de Movimiento de Tierras	6
Tabla 2: Cuadro resumen de Movimiento de Tierras	19
Tabla 3: Compatibilización del alineamiento horizontal – Datos de AC3D	20
Tabla 4: Compatibilización del alineamiento horizontal – Evaluación con pendientes del Alineamiento Vertical	21
Tabla 5: Compatibilización del alineamiento horizontal – Tramos en Tangente	22
Tabla 6: Compatibilización del alineamiento horizontal – Curvas, espirales y sobrecanchos	23
Tabla 7: Compatibilización del alineamiento vertical – Datos del AC3D	24
Tabla 8: Compatibilización del alineamiento vertical – Evaluación de Pendientes	25
Tabla 9: Compatibilización del alineamiento vertical – Curvas convexas y cóncavas	26

1 Evaluación actual de la zona del proyecto

Para el presente estudio, se realizó un análisis de la zona del proyecto por medio de fotografías enfocadas en las principales interferencias encontradas. A continuación se describirá y analizará la toma de instantáneas que se realizó en el recorrido de la zona de la futura vía.

- **Km. 0+300: Intercambio Vial República de Panamá**

En la **Figura 1** se observa el cruce de la vía proyectada con la Av. República de Panamá cuyo flujo vehicular está controlado por semáforos. La calzada sur-norte de República de Panamá está compuesta de cuatro carriles, dos de ellas se orientan hacia la vía expresa y luego del cruce continúan tres carriles; mientras que la calzada norte-sur tiene dos carriles. Cabe destacar que en este sector se ubica la Estación Plaza de Flores del Metropolitano.

Figura 1: Ruta de la Vía Expresa Sur Km. 0+300
Fuente: Elaboración propia

En este sector se está proyectando un intercambio vial de 1 lazo que soluciona el flujo en la dirección de norte hacia el este. La ampliación de la vía expresa tendrá un trazo de paso inferior con respecto a la Av. Rep. de Panamá, pues es la configuración más eficiente para el embarque y desembarque de pasajeros de la futura estación subterránea del COSAC.

- **Km. 0+500**

En la **Figura 2** se observa el trazo proyectado de la ampliación de la vía expresadonde al lado izquierdo del eje existen edificaciones multifamiliares que han respetado el derecho de vía, las afectaciones se proyectan en el lado derecho.

Figura 2: Ruta de la Vía Expresa Sur Km. 0+500

Fuente: Elaboración propia

- **Km. 1+500**

En la **Figura 3** se muestran las principales interferencias encontradas en la progresiva 1+500 de la vía:

- Canal de riego sin revestimiento y de dimensiones aproximadas de 2.0m.x1.0m que va de norte a sur.
- Losas deportivas que serán afectadas por el trazo de la vía.

Figura 3: Ruta de la Vía Expresa Sur Km. 1+500

Fuente: Elaboración propia

- **Km. 1+770: Av. Vicus**

En la **Figura 4** se aprecia la intersección de la Av. Vicus con la vía proyectada, la que ha sido truncada por un cerco perimétrico.

Figura 4: Ruta de la Vía Expresa Sur Km. 1+770
Fuente: Elaboración propia

- **Km. 2+220: Av. Ayacucho**

En la **Figura 5** se puede apreciar la Av. Ayacucho de calzadas separadas con 2 carriles por sentido. En este sector se proyectará un puente de 42.6 m de luz aproximadamente.

Figura 5: Ruta de la Vía Expresa Sur Km. 2+220
Fuente: Elaboración propia

- **Km. 2+750: Av. Surco**

En la **Figura 6** se observa que parte de las instalaciones del Colegio Champagnat y Santa Teresita, serán afectadas por el nuevo trazo. Estas se encuentran cercanas a la Av. Surco.

Figura 6: Ruta de la Vía Expresa Sur Km. 2+750
Fuente: Elaboración propia

- **Km. 3+100: Av. Juan Soto**

En la **Figura 1-7** se detalla el sector de la Av. Juan Soto donde se ubica la Villa FAP, cuyas viviendas serán afectadas por el trazo. Es importante señalar que no se afecta la infraestructura de la base aérea de Las Palmas.

Figura 1 - 1: Ruta de la Vía Expresa Sur Km. 3+100
Fuente: Elaboración propia

- **Km. 4+030: Av. Los Próceres**

Siguiendo el recorrido del trazo, en la **Figura 1-8** se detalla el recorrido de la Av. Los Próceres hacia la autopista Panamericana Sur. La franja presenta una envergadura amplia en la cual se aprecia las vías de servicio adyacente a las edificaciones y una berma central utilizada como áreas verdes. En este sector no se realizarán afectaciones dado que el ancho es suficiente para la construcción de la futura vía expresa.

Figura 1 - 2: Ruta de la Vía Expresa Sur Km. 4+030
Fuente: Elaboración propia

- **Km. 4+651: Empalme con la autopista Panamericana Sur**

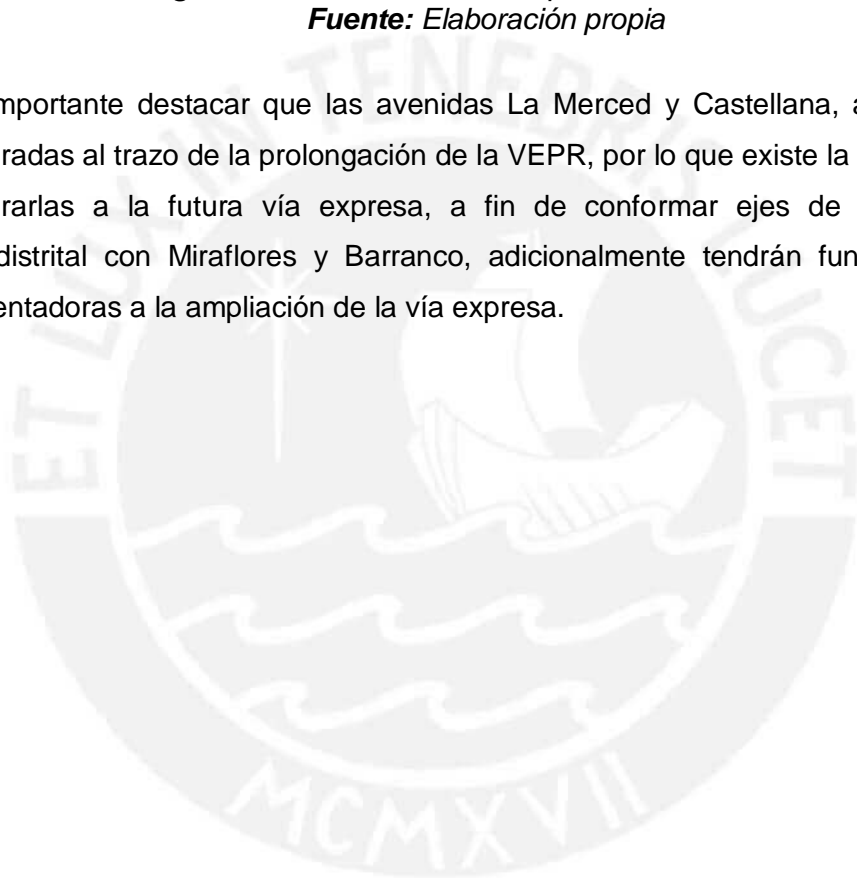

En la vista de la **Figura 1-9** se aprecia el fin del tramo de la vía proyectada, la misma que empalma a la autopista Panamericana Sur Km. 22 (Alt. Av. Pedro

Miota). En este sector se propone una estación subterránea del COSAC, la misma que estará próxima a la estación Atocongo del Tren Eléctrico.

Figura 1 - 3: Ruta de la Vía Expresa Sur Km. 4+651
Fuente: Elaboración propia

Es importante destacar que las avenidas La Merced y Castellana, aún no están integradas al trazo de la prolongación de la VEPR, por lo que existe la necesidad de integrarlas a la futura vía expresa, a fin de conformar ejes de interconexión interdistrital con Miraflores y Barranco, adicionalmente tendrán función vías de alimentadoras a la ampliación de la vía expresa.

2 Movimiento de Tierras (Earthworks)

El cálculo de movimiento de tierras que se realizó en el AC3D se muestra en la **Tabla 1**.

Tabla 1: Reporte de Volúmenes de Movimiento de Tierras

En la **Tabla 2** se detalla un cuadro resumen de la cantidad de movimiento de tierras total, tanto para relleno como para corte.

Tabla 2: Cuadro resumen de Movimiento de Tierras
Fuente: Elaboración propia

Estación de Inicio	0+000.000
Estación de Fin	4+992.674
Área de Corte Acumulada	1,312,535.11
Área de Relleno Acumulada	14,210.61
Área Acumulada Total	1,298,324.48

3 Compatibilización del Alineamiento Horizontal y Vertical con la norma DG-2014

Para la compatibilización del alineamiento horizontal y vertical del AC3D se realizó un cuadro en Excel, donde se podía analizar la comparación con lo regulado en la norma DG-2014 elemento por elemento. En las siguientes tablas se detalla el análisis realizado.

Tabla 3: Compatibilización del alineamiento horizontal – Datos de AC3D
